2. *The impact of the COVID-19 pandemic on our business and operations is uncertain and cannot be predicted.*

The World Health Organization (WHO) declared the 2019 novel coronavirus (“COVID-19”) outbreak a public health emergency of international concern on January 30, 2020, a pandemic on March 11, 2020. Governments and municipalities around the world instituted measures to control the spread of COVID-19, including quarantines, shelter in-place orders, closure of schools, travel restrictions, and closure of non-essential businesses. The COVID-19 pandemic has caused an economic downturn on a global scale, including closure of many businesses and reduced consumer spending, as well as significant market disruption and volatility.

A number of governments and organizations have revised GDP growth forecasts for calendar year 2020 downward in response to the economic slowdown caused by the spread of COVID-19.

The Government of India initially announced a 21-day country-wide lockdown starting on March 25, 2020, which was further extended in several phases with certain modifications and relaxations and there can be no assurance that such lockdowns will not be extended further on one or more occasions. Financial markets were volatile during the Financial Year 2020 due to domestic economic slowdown, concerns on fiscal slippage and geopolitical tensions. Weaknesses in overall economic activity also put pressure on business growth of our company. While various parts of the world, including India, have commenced calibrated easing of lockdown measures, the effects of the eventual outcome remain uncertain and contingent on the future path of the pandemic and the effectiveness of the measures to counter it.

The Spread of Second Wave of Coronavirus in the month of April and May 2021 was most devastating and millions of people of India were under its net. There was complete chaos and deaths of millions of persons due to shortage of Oxygen and ICU Beds have led to complete closure of business and commercial activities in India. Many States in India imposed Strict lockdowns and people were again sitting in homes to counter this virus.

The lockdown did not halt operations within our factories as State Government allowed running of factory with certain restrictions and protocols. Thus, the factories were running at 70% - 90% capacity after lockdown. However, the sales were hampered and large quantities of domestic finished goods was stored at our warehouses. We faced increased inventory levels during the first three months of the pandemic. However, the sales were hampered only during the lockdown while the demand for pet bottle caps increased.

Any further wave of Coronavirus in the country might affect our sales and profitability. Although we did not achieve the growth and profits as projected during the first quarter of FY 2021-22 but our Company managed to take proactive steps to ensure that the business lost was regained in the forthcoming quarters and we continue to closely monitor the impact that COVID-19 may have on our business and results of operations.

3. *We require a number of approvals, licenses, registrations and permits in the ordinary course of our business. Some of the approvals are required to be updated consequent to the change in the name of the company.*

We require a number of approvals, licenses, registrations and permits in ordinary course of our business. Additionally, we need to apply for renewal of approvals which expire, from time to time, as and when required in the ordinary course. Also, on conversion of our company to Public Limited Company, the name has been changed to Cool Caps Industries Limited from erstwhile name Cool Caps

Industries Private Limited vide special resolution passed by our shareholders at Extraordinary General Meeting held on March 05, 2021. Consequent to this change, we have updated the same in various approvals, license and registrations taken by our company in the ordinary course of our business however in some approvals, licenses and registration it is still pending. Further certain key approvals like Fire safety for the company's factory at PO Makardan, PS Domjur Howrah & Plot No.E2A, Sector 1, IIE Growth Centre, Sigaddi, Kotdwara from West Bengal Fire and Emergency Services and Uttarakhand Fire & Emergency Services respectively is pending. Further Certain Registrations under Professional tax & Enrollment's certificate under Assam Professions, Trades Callings and Employments Taxation Act, 1947 for company branch office at Assam, Shops and Commercials establishment registration for Kolkata and branch offices at Assam and Haryana are yet to be applied. In case we fail to transfer/renew/obtain the same in name of the company, same may adversely affect in processing the fund withdrawal application initiated by the employees. For further details please refer to chapter titled "**Government and Other Approvals**" beginning on page 364 of the Draft Red Herring Prospectus.

4. *Changes in technology may render our current technologies obsolete or require us to make substantial capital investments.*

Our business is significantly dependent on the efficient and uninterrupted operation of our technological infrastructure installed in our manufacturing units at Howrah, Kolkata and Kotdwar, Uttarakhand, that ensures smooth operations through various automated machines. Changes in technology may render our current technologies obsolete or require us to make substantial capital investments. Our technology and machineries may become obsolete or may not be upgraded timely, hampering our operations and financial conditions and we may lose our competitive edge. Although we believe that we have installed latest technology and that the chances of a technological innovation are not very high in our sector we shall continue to strive to keep our technology, plant and machinery in line with the latest technological standards. In case of a new found technology, we may be required to implement new technology or upgrade the machineries and other equipment's employed by us. Further, the costs in upgrading our technology and modernizing the plant and machineries are significant which could substantially affect our finances and operations.

5. *Shortage or non-availability of power facilities may adversely affect our manufacturing processes and have an adverse impact on our results of operations and financial conditions.*

Our manufacturing process requires substantial amount of power facilities. We source the power requirement at our Kolkata and Kotdwar manufacturing facilities by procuring the same from West Bengal State Electricity Distribution Company Limited and Uttarakhand Power Corporation Limited respectively, and any disruption in the same may affect our business operation, profitability and financial condition which may subsequently affect our ability to complete orders on time.

6. *Our Promoter / Director and relative of Promoter have provided personal guarantee for loan facilities obtained by our Company, and any failure or default by our Company to repay such loans in accordance with the terms and conditions of the financing documents could trigger repayment obligations on them, which may impact their ability to effectively service their obligations as our Promoter / Directors and thereby, impact our business and operations.*

Our company has availed various credit facilities from bank and financial institutions and has outstanding balances as on 31st March, 2021 amounting to Rs.2668.05 Lakhs. For further details please refer to chapter titled "**Financial Indebtedness**" beginning on page 346 of the Draft Red Herring Prospectus. These loans are secured by the personal guarantee of our Corporate Promoters M/s. Purv Flexipack Private Limited and individual promoters namely Mr. Rajeev Goenka, & Mr. Vanshay Goenka and our directors Mr. Arun Gourisaria, Whole Time Director and Mrs. Poonam Goenka, Non-Executive

Director. Any default or failure by our Company to repay its loans in a timely manner, or at all could trigger repayment obligations on the part of Purv Flexipack Private Limited, Mr. Rajeev Goenka, Mr. Vanshay Goenka, Mr. Arun Gourisaria and Mrs. Poonam Goenka in respect of such loans, which in turn, could have an impact on their ability to effectively service their obligations as Promoter / Director of our Company, thereby having an effect on our business, results of operation and financial condition. Furthermore, in the event that such individual withdraws or terminate their guarantee and collateral security, our lenders for such facilities may ask for alternate guarantees and collateral security, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows.

7. *Our lenders have charge over our movables assets in respect of finance availed by us.*

We have secured our lenders by creating a charge over our movable's assets in respect of credit facilities availed by us from banks and financial institutions. The total amounts outstanding and payable by us as secured loans were Rs. 2,668.05 lakhs as on March 31, 2021. In the event we default in repayment of the credit facilities availed by us and any interest thereof, hypothecation charge on our movable's assets may be invoked by the lenders, which in turn could have significant adverse effect on business, financial condition or results of operations. For further information on the Financial Indebtedness please refer chapter titled "**Financial Indebtedness**" beginning page 346 of the Draft Red Herring Prospectus.

8. *Within the parameters as mentioned in the chapter titled 'Objects of the Issue' beginning on page 101 of this Draft Red Herring Prospectus, our Company's management will have flexibility in applying the proceeds of this Issue.*

We intend to use the entire issue proceeds towards working capital management and general corporate purposes.

We intend to deploy the net issue proceeds in FY 2021-22 & FY 2022-23 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the fresh Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the issue proceeds, please refer chapter titled "**Objects of the Issue**" beginning on page 101 of this Draft Red Herring Prospectus.

The deployment of funds for the purposes described above is at the discretion of our Company's Board of Directors. The fund requirement and deployment are based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled "**Objects of the Issue**" beginning on page 101 of this Draft Red Herring Prospectus, the management will have significant flexibility in applying the proceeds received by our Company from the issue. However, the Company shall comply with Section 27 of the Companies Act, 2013 before varying the "**Object of the issue**". Our Board of Directors will monitor the utilization of the proceeds of this issue.

9. *Certain discrepancies/errors were notices in corporate records related to filling with the Registrar of companies and other provisions of Companies Act, 2013.*

Our company has not complied with certain statutory provisions in the past including but not limited to the details mentioned in this Draft Red Herring Prospectus. For instance, our company filed DIR-12 of appointment of our Directors/ Promoters i.e., Arun Gourisaria and Vanshay Goenka as a non-

Executive Director. During the course of such appointment our Directors/ Promoters were received remuneration for the services rendered to the company, which is a non-compliance as per Companies Act.

Further any penalty or action taken by any regulatory bodies authorizes in future, for non-compliance with provisions of corporate and others laws could impact the Financial Position of the company.

10. We could become liable to customers, suffer adverse publicity and incur substantial costs as a result of defects in our products, which in turn could adversely affect our reputation, and our sales could be diminished if we are associated with negative publicity.

Any failure or defect in our products could result in a claim against us for damages, regardless of our responsibility for such a failure or defect. However, our Company is well equipped with in-house testing facility to test the products. Our finished product has to undergo a strict quality check to ensure that they are of relevant quality as per the standards set. Although we attempt to maintain quality standards, we cannot assure that all our products would be of uniform quality, which in turn could adversely affect our reputation, and our sales could be diminished if we are associated with negative publicity.

Also, our business is dependent on the trust our customers have in the quality of our products. Any negative publicity regarding our company, brand, or products, including those arising from a drop-in quality of merchandise from our vendors, mishaps resulting from the use of our products, or any other unforeseen events could affect our reputation and our results from operations.

11. Our lenders have imposed certain restrictive conditions on us under our financing arrangements regarding the end use of borrowed funds, submission of documents and meeting the margin requirements. Non-compliance with the restrictive conditions may lead to repayment of the borrowings in whole or in part and the company may incur other related costs.

There can be no assurance that we will be able to comply with these restrictive covenants in the future. Any failure to comply with these requirements or other conditions or covenants under our financing agreements that is not waived by our lenders or is not otherwise cured by us, may require us to repay the borrowing in whole or part and may include other related costs. Our Company may be forced to sell some or all of its assets or limit our operations. This may adversely affect our ability to conduct our business and impair our future growth plans. For further information, see the chapter “**Financial Indebtedness**” on page 346 of the Draft Red Herring Prospectus.

Though these covenants are restrictive to some extent for us, however it ensures financial discipline, which would help us in the long run to improve our financial performance.

12. We currently avail benefits under certain export promotion schemes. Any failure in meeting the obligations under such schemes, may result in adversely affecting our business operations and our financial condition.

We currently avail benefits under certain export promotion schemes, namely, Export Promotion Capital Goods (“EPCG”) license. As per the licensing requirement under the said scheme, we are bound by certain export obligations which require us to export goods of a defined amount, failing which, we may have to pay the Government, a sum equivalent to the duty benefit enjoyed by us under the said schemes along with interest. As of 31st March, 2021, our pending obligations against EPCG License was USD 20,47,513.63, which will be adjusted at the time of the consequent exports as per the required timelines. Any reduction or withdrawal of benefits or our inability to meet any of the

conditions prescribed under any of the schemes would adversely affect our business and financial condition.

13. Our Company requires significant amounts of working capital for a continued growth. Our inability to meet our working capital requirements may have an adverse effect on our results of operations. Further, failure to manage our inventory could have an adverse effect on our sales, profitability, cash flow and liquidity.

Our business requires a significant amount of working capital for smooth functioning. As on March 31, 2021 and March 31, 2020, our inventories form **12.90%** and **4.84%** of our respective total assets and **29.59%** and **12.27%** of our respective current assets and trade receivables form **19.49%** and **13.55%** of our respective total assets and **44.71%** and **34.35%** of our respective current assets. We meet our requirement for working capital majorly through banking facilities and Net worth and internal accruals. In future, our inability, if any, to meet our working capital requirements or inability to renew our existing working capital requirements through banking arrangements can adversely impact our business operations and financial position.

Our business is working capital intensive. A significant portion of our working capital is utilized towards trade receivables and inventories. Summary of our working capital position based on the consolidated financial statement is given below:

(Rs. in Lakhs)

S. No.	Particulars	As At FY 2020-21	As At FY 2019-20
I	Current Assets		
1	Inventories	628.94	186.75
2	Trade Receivables	950.27	522.99
3	Short Term Investments	81.52	64.44
4	Cash and Cash Equivalents	22.17	67.42
5	Short Term Loans & Advances and Other Current Assets	442.74	680.74
	Total Current Assets (I)	2,125.64	1,522.34
II	Current Liabilities		
1	Trade Payables	361.32	125.77
2	Other Current Liabilities & Provisions	606.55	423.71
	Total Current Liabilities (II)	967.87	549.48
	Working Capital Requirement (I – II)	1,157.77	972.86
	Inventories as a % of Total Current Assets	29.59%	12.27%
	Trade Receivables as a % of Total Current Assets	44.71%	34.35%

We intend to continue growing by expanding our business operations. This may result in increase in the quantum of current assets particularly trade receivables and inventories. The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and manufacture and trade inventory accordingly. We estimate our sales based on the forecast, demand and requirements and also on the customer specifications.

Natural disasters such as earthquakes, extreme climatic or weather conditions such as floods or droughts may adversely impact the supply of raw material and local transportation. Should our supply

of raw materials be disrupted, we may not be able to procure an alternate source of supply in time to meet the demands of our customers. Such disruption to supply would materially and adversely affect our business, profitability and reputation. In addition, disruptions to the delivery of product to our customer may occur for reasons such as poor handling, transportation bottlenecks, or labour strikes, which could lead to delayed or lost deliveries or damaged products and disrupt supply of these products. To improve our line capability, we try to stock our inventory at our manufacturing facility. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively. If we over-stock inventory, our capital requirements will increase and we will incur additional financing costs. If we under-stock inventory, our ability to meet customer demand and our operating results may be adversely affected. Any mismatch between our planning and actual consumer consumption could lead to potential excess inventory or out-of-stock situations, either of which could have an adverse effect on our business, financial condition and results of operation.

We intend to continue growing by expanding our business operations. This may result in increase in the quantum of current assets particularly trade receivables and inventories. Our inability to maintain sufficient cash flow, credit facility and other sources of fund, in a timely manner, or at all, to meet the requirement of working capital could adversely affect our financial condition and result of our operations. For further details regarding working capital requirement, please refer to the chapters titled **“Objects of the Issue”** and **“Management’s Discussion and Analysis of Financial Condition and Results of Operation”** beginning on pages 101 and 315, respectively, of this Draft Letter of Offer.

14. Our Company has manufacturing facilities located at Kolkata, West Bengal and Kotdwar, Uttarakhand. Any delay in production at, or shutdown of, or any interruption for a significant period of time, in this facility may in turn adversely affect our business, financial condition and results of operations.

Our Company has manufacturing facility located at Kolkata, West Bengal and Kotdwar, Uttarakhand. Our success depends on our ability to successfully manufacturing and delivering our products to meet our customer demand. Our manufacturing facility are susceptible to damage or interruption such as human error, breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, terrorist attacks, acts of war, break-ins, earthquakes, other natural disasters and industrial accidents and similar events. Further, our manufacturing facilities are also subject to operational risk arising from compliance with the directives of relevant government authorities. Operational risks may result in personal injury and property damage and the imposition of civil and criminal penalties. If our Company experiences delays in production or shutdowns at any or all of these facilities due to any reason, including disruptions caused by disputes with its workforce or any external factors, our Company’s operations will be significantly affected, which in turn would have a material adverse effect on its business, financial condition and results of operations.

15. We have experienced negative cash flows in relation to our operating and investment activities in recent years/periods. Any negative cash flows in the future could adversely affect our results of operations and financial condition.

We had a cash inflow from operating activities of Rs 446.07 Lakhs, (Rs. 49.76) Lakhs and Rs. 361.31 Lakhs for the FY 2020-21, FY 2019-20 and FY 2018-19. respectively. Further, we had a cash inflow/ (outflow) from investing activities of (Rs. 634.60) Lakhs, (Rs.1205.80) and (Rs.313.10) Lakhs for the FY 2020-21, FY 2019-20 and FY 2018-19 respectively. If we experience any cash outflow in the future, this could adversely affect our business prospects, financial condition and results of operations. For further information, see **“Financial Statements as Restated”** and **“Management’s Discussion and Analysis of Financial Condition and Results of Operations”** beginning on pages 219 and 315 respectively.

16. We have certain contingent liabilities and commitments, which may adversely affect our financial condition.

As on March 31, 2021 our Company has following contingent liabilities as per restated consolidated financial statements, the details for which are as under:

Particulars	Amount (Rs. in lakhs)

Bank Guarantees (Net of Margin Money)	43.89
Other Tax other than Income Tax	1.76
Other Corporate Guarantees	2998.86
Total	3278.78

In the event any of the contingencies mentioned above materialize or increase in the future, our financial condition could be adversely affected. For further details, see the section entitled "**Financial Statement as Restated**" on page 219 of this Draft Red Herring Prospectus.

17. Our operations may be adversely affected in case of industrial accidents at any of our manufacturing facilities.

Usage of machinery, handling of materials by labour during manufacturing process or otherwise, lifting of materials by humans, etc. may result in accidents, which could cause injury to our labour, employees, other persons on the site and could also damage our properties thereby affecting our operations. Occurrence of accidents could hamper our manufacturing process and consequently affect our profitability.

18. Any discrepancy in our products and services could make our Company liable for customer claims, which in turn could affect our Company's results of operations.

Our Company is bound by the terms and conditions as stated in the purchase order placed by its customers. There are no specific regulations governing the supply of the same other than the general law of contracts. Therefore, any claims made by these customers for defects in the products or discrepancy in the services rendered, would be subject to these terms and conditions, which are in the nature of normal contractual obligations in India. Any violation of these obligations could impact our Company's results of operations and financial conditions along with loss of customers.

19. Properties, on which we have our registered office, Manufacturing facilities & branch office, are not owned by us.

The properties where our registered office, manufacturing facilities and branch offices are situated in Kolkata, Guwahati and Gurugram are not owned by our company and the same have been taken on lease. The agreements are renewable on mutually agreed terms. In the event of the said agreements are not being renewed or in case we have to vacate the said premises then our business operations may be disturbed till the time we are able to locate to any new premises for undertaking our manufacturing and administrative activities.

The rent agreements have a clause for the renewal of the same for a further period as may be mutually agreed among the parties after the expiry of the current period. For details on properties taken on

lease / rent by us please refer to the heading titled ***“Properties”*** in chapter titled ***“Our Business”*** beginning on page 158 of this Draft Red Herring Prospectus.

20. *The industry segments in which we operate being fragmented, we face competition from other players, which may affect our business operations and financial conditions.*

The market for our products is competitive on account of both the organized and unorganized players. Players in this industry generally compete with each other on key attributes such as technical competence, quality of products, distribution network, pricing and timely delivery. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive. Moreover, the unorganized sector offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

21. *We have in the past entered into related party transactions and may continue to do so in the future.*

We have entered into related party transactions with our promoters and directors. While we believe that all such transactions have been conducted on the arm’s length basis, however it is difficult to ascertain whether more favorable terms would have been achieved had such transactions been entered with unrelated parties. Furthermore, it is likely that we will enter into the related party transactions in the future also. For details of these transactions, please refer to section titled ***“Related Party Transactions”*** at page 217 of this Draft Red Herring Prospectus.

22. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see ***“Dividend Policy”*** on page 218 of this Draft Red Herring Prospectus.

23. *Our success depends largely upon the services of our Directors, Promoters and other Key Managerial Personnel and our ability to attract and retain them. Demand for Key Managerial Personnel in the industry is intense and our inability to attract and retain Key Managerial Personnel may affect the operations of our Company.*

Our success is substantially dependent on the expertise and services of our Directors, Promoters and our Key Managerial Personnel. They provide expertise which enables us to make well informed decisions in relation to our business and our future prospects. Our future performance will depend upon the continued services of these persons. Demand for Key Managerial Personnel in the industry is intense. We cannot assure you that we will be able to retain any or all, or that our succession planning will help to replace, the key members of our management. The loss of the services of such key members of our management team and the failure of any succession plans to replace such key members could have an adverse effect on our business and the results of our operations.

- 24. *In addition to normal remuneration or benefits and reimbursement of expenses, some of our Promoters, Directors and key managerial personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.***

Our Promoters, Directors and Key Managerial Personnel are interested in our Company to the extent of remuneration paid to them for services rendered and reimbursement of expenses payable to them. In addition, some of our Promoters, Directors and Key Managerial Personnel may also be interested to the extent of their shareholding and dividend entitlement in our Company. For further information, see “**Capital Structure**” and “**Our Management**” on pages 81 and 181, respectively, of this Draft Red Herring Prospectus.

- 25. *We rely on a limited number of suppliers for raw materials.***

Our company top 10 and top 5 suppliers contributed 72.13% and 68.53% of our raw material procurement for the period ended March 31, 2021 respectively. The loss of a significant supplier for raw materials would have a material impact on our financial results. We cannot assure that we can maintain the historical levels of business from these entities or that we will be able to replace them in case we lose any of them.

Given our reliance on limited suppliers, if they are unable to deliver the products on a timely manner, or at all, or meet our design or quality specifications, we may be unable to meet our product and service delivery timelines. There can be no assurance that we will be able to maintain strategic relationships with our suppliers or diversify our supplier base. Further, our suppliers may enter into exclusive arrangements with our competitors and we may be unable to obtain alternate sources for our components at commercially reasonable prices, or at all or enter into alternative arrangements with our suppliers. We will have to incur additional payment delay costs as a result and consequently, our reputation, business, results of operations and financial condition may be materially and adversely affected.

- 26. *If we are unable to source business opportunities effectively, we may not achieve our financial objectives.***

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It also is possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

- 27. *Excessive dependence on Key managerial personnel for the project for which the issue is being made.***

The development, production and marketing of our products highly dependent on the skills and continuous services of Mr. Rajeev Goenka, Chairman and Managing Director. If he is unable or unwilling to continue in their present positions or join a competitor or form a competing company, we may lose customers, suppliers and key professionals and staff members to them, thereby, disrupting our business operations which could materially adversely affect our business, financial condition and results of operations, and we may not be able to replace them easily.

- 28. *Our future funds requirements, in the form of issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.***

We may require additional capital from time to time depending on our business needs. Any issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

- 29. *Our Company has unsecured loans which are repayable on demand. Any Demand loan from lenders for repayment of such unsecured loans, may adversely affect our cash flows.***

Based on Restated Financial Statements, our company has unsecured loans as at March 31st, 2021 amounting to Rs. 94.24 Lakhs from promoter & promoter groups that are repayable on demand to the relevant lenders as per restated financial statements. Further, some of these loans are not repayable in accordance with any agreed repayment schedule and may be recalled by the relevant lender at any time. Any such unexpected demand or accelerated repayment may have a material adverse effect on the business, cash flows and financial condition of the borrower against which repayment is sought. Any demand from lenders for repayment of such unsecured loans, may adversely affect our cash flows. For, further details of unsecured loans of our company, please refer chapter titled “**Financials Statements as Restated**” beginning on page 219 of this Draft Red Herring Prospectus.

- 30. *Our insurance policies do not cover all risks, specifically risks like product defect / liability risk, loss of profits and terrorism.***

Our company has not obtained insurance coverage in respect of all risks. In absence of any coverage of insurance our company faces the risks of loss of profit due to product defect / liability risk, loss of profits, losses due to terrorism, etc. If we suffer a significant uninsured loss, our business, financial condition and results of operations may be materially and adversely affected. For further details on insurance policies, please refer chapter titled “**Our Business**” beginning on page 138 of the Draft Red Herring Prospectus.

- 31. *The industry in which we operate is labour intensive and our operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees.***

Our industry being labour intensive is dependent on labour force for carrying out its operations. Shortage of skilled/unskilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. We have not experienced any major disruptions in our business operations due to disputes or other problems with our work force in the past; however, there can be no assurance that we will not experience such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management’s attention and result in increased costs. India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits.

Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain flexible labour policies, and we may face the threat of labour unrest, work stoppages and diversion of our management's attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition.

32. *Our Promoters will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.*

After completion of the issue, our Promoters will collectively own [●] % of the Equity Shares. As a result, our Promoters will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

33. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and cause serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

34. *There is no monitoring agency appointed by Our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by the Audit Committee.*

As per SEBI (ICDR) Regulations, 2018 appointment of monitoring agency is required only for Issue size above Rs. 10,000 Lakhs. Hence, we have not appointed a monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the National Stock Exchange of India Limited and shall also simultaneously make the material deviations/ adverse comments of the audit committee public.

35. *Industry information included in this Draft Red Herring Prospectus has been derived from industry reports commissioned by us for such purpose. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.*

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this Draft Red Herring Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be

considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Draft Red Herring Prospectus.

36. *Our business is subject to season volatility due to packaged mineral water and soft drinks sales in summer and winter seasons.*

Our company major sales of its products are made to packaged mineral water supplier companies and soft drinks providers. The sales of these items are at peak in summer seasons and lower in winter seasons as per industry practices. As our company products are supplied to these vendors, our major sales are done in summer seasons and lesser sales in winter seasons. In case of any variation in sales our number for any quarter or half year may not reflect true affairs of our company and any reliance placed on it might affect investors and other stake holders in general.

Issue Specific Risks

37. *There are restrictions on daily / weekly / monthly movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.*

Once listed, we would be subject to circuit breakers imposed by designated stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

38. *The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.*

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares

or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

39. *After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.*

The price of the Equity Shares on the Stock Exchanges may fluctuate as a result of the factors, including:

- Volatility in the Indian and global capital market;
- Company's results of operations and financial performance;
- Performance of Company's competitors;
- Changes in our estimates of performance or recommendations by financial analysts;
- Significant developments in India's economic and fiscal policies; and
- Significant developments in India's environmental regulations.

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for the Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

40. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue Price of our Equity Shares has been determined by Book Built Method. This price is based on numerous factors (For further information, please refer chapter titled "**Basis for Issue Price**" beginning on page 109 of this Draft Red Herring Prospectus and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

41. *The average cost of acquisition of Equity Shares by our Promoters could be lower than the Issue price.*

Our Promoters average cost of acquisition of Equity Shares in our Company could be lower than the Issue Price as decided by the Company in consultation with the Book Runner Lead Manager's. For

further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer chapter title “**Capital Structure**” beginning on page 81 of this Draft Red Herring Prospectus.

42. You will not be able to sell immediately on Stock Exchange any of the Equity Shares you purchase in the issue until the Issue receives appropriate trading permissions.

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. We cannot assure you that the Equity Shares will be credited to investor’s demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in the Draft Red Herring Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, 2013, in the event that the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

43. QIB and Non-Institutional investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any age after submitting the Bid

Pursuant to SEBI ICDR Regulations, QIBs and Non-Institutional investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any age after submitting the Bid. Retail Individual Investors can revise their Bid during the Bid Period and withdraw their Bids until Bid Closing date. While our Company is required to complete Allotment pursuant to issue within six working days from the Bid Closing date, events affecting the Bidders decision to invest in Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, result of operations or financial condition may arise between the date of submission of the Bid and allotment. Our Company may complete the allotment of Equity shares even if such events occur, and such events limit the Bidders ability to sell the Equity Shares allotted pursuant to the issue or cause the trading price of Equity Shares to decline on listing.

44. Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

EXTERNAL RISKS FACTORS

Industry Related Risks

45. Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or

be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

Other Risks

46. Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements prepared and presented in accordance with SEBI ICDR Regulations contained in this Draft Red Herring Prospectus.

As stated in the reports of the Auditor included in this Draft Red Herring Prospectus under chapter “**Financial Statements as restated**” beginning on page 219, the financial statements included in this Draft Red Herring Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Draft Red Herring Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Draft Red Herring Prospectus.

Accordingly, the degree to which the financial information included in this Draft Red Herring Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Draft Red Herring Prospectus should accordingly be limited.

47. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.

The regulatory and policy environment in India is evolving and subject to change. Such changes in applicable law and policy in India, including the instances described below, may adversely affect our business, financial condition, results of operation, performance and prospects in India, to the extent that we are not able to suitably respond to and comply with such changes.

For instance, in November 2016, the Government of India demonetized certain – high value denominations of currency. Trading and retail businesses in India were impacted for a limited period of time on account of such demonetization. Such businesses have subsequently needed to introduce additional point of sale instruments to improve their collection process.

The Government of India implemented a comprehensive national goods and service tax (“GST”) regime that combines taxes and levies by the central and state governments into a unified rate structure from July 01, 2017, which we believe will result in fundamental changes. However, given its recent introduction, there is no established practice regarding the implementation of, and compliance with, GST. The implementation of the new GST regime has increased the operational and compliance burden for Indian companies and has also led to various uncertainties. Any future increases and amendments to the GST regime may further affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the introduction of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to

GST, as it is implemented. Further, as GST is implemented, there can be no assurance that we will not be required to comply with additional procedures and/or obtain additional approvals and licenses from the government and other regulatory bodies or that they will not impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of GST may have a material adverse effect on our business, financial condition and results of operations.

Further, the General Anti Avoidance Rules came into effect on April 1, 2017. The effect of the application of these provisions to our business in India is at present uncertain. Furthermore, the Finance Act, 2019 instituted a number of amendments to the existing direct and indirect tax regime which includes the withdrawal of long-term capital gains exemptions on equity shares, long term capital gains applicability in the hands of Foreign Institutional Investors and applicability of dividend distribution tax for certain transactions with shareholders, among others.

48. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and de-regulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

49. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which our company operates contained in the Draft Red Herring Prospectus.*

While facts and other statistics in this Draft Red Herring Prospectus relating to India, the Indian economy and the industry in which our company operates has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled "***Our Industry***" beginning on page 116 of the Draft Red Herring Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

50. *Financial instability in Indian financial markets could adversely affect our Company's results of operations and financial condition.*

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian

economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

51. *Conditions in the Indian securities market may affect the price or liquidity of our Equity Shares.*

The Indian securities markets are smaller than securities markets in more developed economies and the regulation and monitoring of Indian securities markets and the activities of investors, brokers and other participants differ, in some cases significantly, from those in the more developed economies. Indian stock exchanges have in the past experienced substantial fluctuations in the prices of listed securities. Further, the Indian stock exchanges have experienced volatility in the recent times. The Indian stock exchanges have also experienced problems that have affected the market price and liquidity of the securities of Indian companies, such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time-to-time restricted securities from trading and limited price movements. A closure of, or trading stoppage on the EMERGE Platform of National Stock Exchange of India Limited could adversely affect the trading price of the Equity Shares.

52. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

53. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

54. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy; disrupt the transportation of goods and supplies, and costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

55. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

56. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighboring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years, and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

The process of Book Building under the SEBI ICDR Regulations and the Bidding Process are subject to change from time to time and the investors are advised to make their own judgment about investment through this process prior to submitting a Bid in the Issue.

Illustration of Book Building and Price Discovery Process

(Investors should note that this example is solely for illustrative purposes and is not specific to the Issue) Bidders can bid at any price within the price band. For instance, assume a price band of Rs. 20.00/- to Rs. 24.00/- per equity share, issue size of 3,000 equity shares and receipt of five bids from bidders, details of which are shown in the table below. A graphical representation of the consolidated demand and price would be made available at the bidding centres during the bidding period. The illustrative book below shows the demand for the equity shares of the issuer company at various prices and is collated from bids received from various investors.

Bid Quantity	Bid Price (Rs.)	Cumulative Bid Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the issuer is able to issue the desired number of shares is the price at which the book cuts off, i.e., Rs. 22/- in the above example. The issuer, in consultation with the Book Running Lead Manager will finalize the issue price at or below such cut – off price, i.e., at or below Rs. 22/-. All bids at or above this issue price and cut – off bids are valid bids and are considered for allocation in the respective categories.

Steps to be taken by the Bidders for Bidding:

- 1) Check eligibility for making a Bid (see section titled “*Issue Procedure*” on page 395 of this Draft Red Herring Prospectus);
- 2) Ensure that you have a demat account and the demat account details are correctly mentioned in the Bid cum Application Form;
- 3) Ensure correctness of your PAN, DP ID, Client ID and UPI ID mentioned in the Bid cum Application Form. Based on these parameters, the Registrar to the Issue will obtain the Demographic Details of the Bidders from the Depositories.
- 4) Except for Bids on behalf of the Central or State Government officials, residents of Sikkim and the officials appointed by the courts, who may be exempt from specifying their PAN for transacting in the securities market, for Bids of all values ensure that you have mentioned your PAN allotted under the Income Tax Act in the Bid cum Application Form. The exemption for Central or State Governments and officials appointed by the courts and for investors residing in Sikkim is subject to the Depository Participant’s verification of the veracity of such claims of the investors by collecting sufficient documentary evidence in support of their claims.
- 5) Ensure that the Bid cum Application Form is duly completed as per instructions given in this Draft Red Herring Prospectus and in the Bid cum Application Form;

Justifications for Holding Period levels

Justifications for Holding Period level mentioned in the table above are provided below:

Particulars	Justification for Holding Levels
Current Assets:	
Inventories: - Finished Goods	In order to achieve cost competitiveness, shorter leads times and support our increasing operations, we aim to stock efficient finished goods and stock-in-trade inventory levels. From FY 2019-20 our finished goods days ranged around 0.35 months which increased to 1.76 months in FY 2020-21 on account of business increase, which we assume to continue at levels of approx. 2 months from Financial Year 2021-22 and subsequent financial years.
Trade Receivables	We have assumed trade receivables credit period of 3.60 months in the financial year 2021-22 which is in line with the credit period of financial year 2020-21 and 2019-20. It is expected to be at same levels from subsequent financial years as we expect to realize our receivables in the same manner as done previously to grow our operations. Our management believes that the existing credit period to our customers is reasonable for our business operations
Current Liabilities:	
Trade Payables	We have estimated trade payables credit period of 0.50 months for the Financial Year 2021-22 and going forward, as against 1.91 months in Financial Year 2020-21 and 0.95 in Financial Year 2019-20 as our Company expects to achieve better and favorable pricing terms by adhering minimum payables credit period. Since one of the objects of IPO is to meet the working capital requirements of the company, our management is planning to pay off majority of our creditors from the Net Issue Proceeds which would result in lower holding period levels in the subsequent periods. This would help us in maintaining good terms with our creditors.

Our Company proposes to utilize Rs. [●] lakhs of the Net Proceeds in the Financial Year 2021-22 and FY 2022-23 towards working capital requirements. The balance portion of our working capital requirement will be fulfilled from existing bank borrowings and internal accruals / net-worth.

2. General Corporate Purposes

Our management, in accordance with the policies of our Board, will have flexibility in utilizing the proceeds earmarked for general corporate purposes. We intend to deploy the issue proceeds aggregating Rs. [●] lakhs towards the general corporate purposes to drive our business growth. In accordance with the policies set up by our Board, we have flexibility in applying the remaining Net Proceeds, for general corporate purpose including but not restricted to the following:

- a) Meeting operating expenses;
- b) the strengthening of our business development and marketing capabilities;
- c) Strategic Initiatives; and
- d) On – going general corporate exigencies, which the Company in the ordinary course of business may not foresee or any other purposes as approved by our Board of Directors, subject to compliance with the necessary provisions of the Companies Act.

We confirm that any issue related expenses shall not be considered as a part of General Corporate Purpose. Further, we confirm that the amount for general corporate purposes, as mentioned in the Draft Red Herring Prospectus, shall not exceed 25% of the amount being raised by our Company through this Issue, in compliance with SEBI ICDR Regulations.

The quantum of utilization of funds towards each of the above purposes will be determined by our Board of Directors based on the permissible amount actually available under the head “**General Corporate Purposes**” and the business requirements of our Company, from time to time. CAPS AND CLOSURES PRODUCT OVERVIEW

Caps and closures play a vital role in packaging, and they are devices and techniques used to close or seal container such as a bottle, jug, jar, tube, can, etc. Closures can be a cap, cover, lid, plug, etc. Caps and closures are made up of suitable product packaging’s such as metals, plastics, and rubber.

Many containers and packages require a means of closing. It can be a separate device or seal or sometimes an integral latch or lock. Depending on the contents and container, closures have several functions:

- Keep the container closed and the contents contained for the specified shelf life until time of opening.
- Provide a barrier to dirt, oxygen, moisture, etc. Control of permeation is critical to many types of products: foods, chemicals, etc.
- Keep the product secure from undesired premature opening.
- Provide a means of reclosing or reusing the container.
- Assist in dispensing and use of product.
- Allow reasonable ease to open the container by the intended user. Difficult to open containers may cause wrap rage. The force or torque required to open a closure is an important consideration for packaging engineers.

Many types of packaging with their closures are regulated for strength, safety, security, communication, recycling, and environmental requirements plus many others.

PLASTIC BOTTLES MARKET – GLOBAL OVERVIEW

MARKET OVERVIEW

The global plastic bottles and containers market (henceforth, referred to as the market studied) was valued at USD 166.78 billion in 2019, and it is expected to reach a value of USD 224.97 billion by 2025, while registering a CAGR of 6.49% from 2020 to 2025. Plastic packaging is becoming popular among consumers over other products as a plastic package is light in weight and is easier to handle. Similarly,

even the major manufacturers prefer to use plastic packaging solutions, owing to their lower cost of production.

Moreover, the introduction of polyethylene terephthalate (PET) and high-density polyethylene (HDPE) polymers are expanding the plastic bottling applications. The market is witnessing an increasing demand for PET bottles in the bottled and soft water markets. There is a wide variety of innovative, cost-effective, sustainable packaging solutions emerging in the market, and plastic, as a product, is accepted globally. It has led to the leading players, like Amcor, introducing new plastic product formats to cater to the demand for bottles.

Manufacturers prefer PET over other plastic packaging products, as it has a minimum loss of raw material during the manufacturing process when compared to other plastic products. Its recyclability and the feature to add multiple colors and designs augment it to become a preferred choice. Refillable products have emerged with the rising consumer awareness for the environment and have acted in creating demand for the product.

Moreover, Colgate-Palmolive, a prominent consumer products company, based in New York, committed to 100% recyclability of packaging across all its product categories by 2025 and achieving a 25% recycled content currently from plastic packaging. L'Oréal, a cosmetics brand, is working toward ensuring that all its plastic packaging will be rechargeable, refillable, recyclable, or compostable, by 2025.

With the COVID-19 outbreak affecting the market, countries, globally, seem to be shifting toward single-use plastics. Supply chains, additionally, are being strained to meet a surge in demand for single-use plastic packaging and medical supplies. Multiple governments, such as in India, the Tamil Nadu government suspended the ban on single-use plastic bottles and bags in retail trade in the wake of the COVID-19 disruption.

Plastic bottles are generally made up of plastic resins, such as PET, PP, and HDPE. Bottles are rigid plastic container with an open cap medium or a dispensing interface (such as a dropper, nozzles, threaded caps, pumps, sprays, etc.) that are primarily used by the manufacturer for packing liquid, oil, or semi-solid products.

GLOBAL HIGH-END PET BOTTLES MARKET: SNAPSHOT

Polyethylene terephthalate, or PET, is a very commonly used polyester ever since its discovery in 1941. The easiest way to recognize PET in commercial use is to look for the “#1” sign on the plastic, which is the global indicator of the polyester. The two key physical properties of PET that make it so popular are its strength and non-toxic nature. PET is nearly 100 percent recyclable, as a new PET product can be made from an older PET product of the same volume, and this process can be essentially repeated an infinite number of times. However, the current scenario of the recycling industry is a large number of scattered players with weak infrastructure, along with massive issues related to waste segregation. This causes an enormous volume of landfills to contain plastics, PET being one of the polyesters found in high volumes.

The global PET bottles market has witnessed a 7% CAGR in the last five years and this is primarily because of speedy development of FMCG sector. The BRICS countries are going to be dominant forces in the overall PET market. India and China have enormous potential to emerge as market leaders among these countries. Since the APAC region is one of the major markets (around 40% of the global PET market), China and India also have a strategic advantage. They get low operating and exporting costs which escalates the overall profitability. Not just that, since domestic demand has also shown an increasing trend, it is quite likely that India will witness a much higher demand for flexible PET packaging. The high-end PET bottle represents light-weight and eco-design PET bottle which is 25-40% lighter than the traditional PET bottle. High-end PET bottles are becoming more extensively used because they are easier to handle, stronger, and can be resealed.

HIGH-END PET BOTTLES MARKET - MARKET SEGMENTATION

High-end PET bottles are classified into different categories based on packaging type, process, technology type, and end use type. On the basis of packaging type, the high-end PET bottles are segmented into rigid packaging and flexible packaging. On the basis of process, high-end PET bottles are segmented into blow-molded and thermoformed. On the basis of technology, high-end PET bottles are segmented into hot fill, cold fill, aseptic fill, and others. Other technology includes counter-pressure, low vacuum gravity, high vacuum gravity, and positive pressure. On the basis of end use, high-end PET bottles are segmented into food, beverages, pharmaceuticals, cosmetics & personal care products, household products, and others. Other end-use includes industrial products, consumer durables, etc.

HIGH-END PET BOTTLES MARKET - REGIONAL OUTLOOK

Geographically, the high-end PET bottles market can be segmented into North America, Latin America, Europe, Asia-Pacific (APAC), and Middle East & Africa (MEA). The growth of global high-end PET bottles market is expected to witness a healthy CAGR over the forecast period of 2016 to 2024. Moreover, Asia-Pacific is expected to witness high growth in the high-end pet bottles market due to rise in consumption of food and beverages. The demand in the High-end PET bottles market is expected to witness an above average growth in North America due to the higher adoption of high-end PET bottles in beer and wine industries.

KEY MARKET TRENDS

HIGH-END PET BOTTLES MARKET- MARKET DYNAMICS

Earlier, the beverage industry stayed away from plastic bottles. Beer and wine manufacturers especially did not favor plastic bottles in the past primarily due to safety concerns. However, today, advancement in technology has made it possible to use high-end PET bottles which extend the shelf-life of a product. This has caused a hike in demand for high-end PET bottles. One of the other factors which are driving the high-end PET bottles market is higher acceptance of flexible jam and sauce bottles. Other than that, higher sustainability, low damage and easy shipping have made high-end PET bottles a preferred choice. Moreover, in pharmaceuticals, there are various medicines which need high density bottles. High-end PET bottles play a vital role in that market. On the other hand, there are some restraining factors as well which are affecting the high-end PET bottles market in a negative way. These bottles undergo slow degradation and can prove to be harmful when consumed by animals. They cause blockage and use oil which is already a scarce natural resource. Future opportunities for high-end PET bottles have been observed by using brand identity and brand's presence.

Beverages to Drive the Market Growth

- The market for plastic bottles in the beverage sector is anticipated to witness growth, owing to the never-ending demand for bottled water and non-alcoholic beverages. The demand for bottled water is credited to consumers' propensity for specifically demanding high-quality drinking water, owing to the fear of diseases as an aftermath of drinking polluted tap water and the ease of portability and convenience provided by bottled water.
- Further, in many developed and developing economies, people favor bottled water. Bottled water is sold in stores and places selling various drinks. For instance, the International Bottled Water Association (IBWA) stated that Americans favor bottled water over other packaged beverages. Moreover, as per International Bottled Water Association (IBWA), they consumed 13.8 billion gallons of bottled water in 2018. Also, according to a new national survey conducted online by The Harris Poll on behalf of the IBWA, more than 9 in 10 Americans expect bottled water to be available wherever other drinks are sold.
- The market for plastic bottles is also anticipated to benefit from the alcoholic beverage sector. The gradual shift toward plastic bottles in the wine sector is observed was the recent past. For instance, as per EnVino, a plastic wine bottle venture in Burlingame, California, the containers weigh about one-eighth of a typical glass wine bottle and take up 20% less space, thus, enabling winemakers to save fuel by shipping 30% more wine per truck.
- In February 2020, Amcor announced its latest custom designs at the Wine and Grape Symposium, North America. The company also announced collaboration with Garçon Wines, a UK-based startup. Through this collaboration, Amcor plans to produce flat wine bottles made with post-consumer recycled (PCR) PET plastic in the United States.

Leading Countries in Wine Export Worldwide Based on Volume, In Million Hectoliters, 2019

Asia-Pacific to Witness Highest Growth

- One of the main initiatives across multiple countries in the Asia-Pacific region has generally been to cut down the usage of single-use plastic bottles and packaging. But, companies might likely resort to plastic packaging to combat the pandemic's spread, putting the sustainability aspect away at this time.
- The healthcare and pharmaceutical sector in China is one of the world's largest markets, primarily driven by its aging population. According to Pharmaceutical Technology, China's pharma market's

size was forecasted to surge up to almost 574 billion U.S. dollars by 2022. Hence, there is a growth possibility for domestic players as they might experience an increase in demand for plastic bottles from these companies.

- The plastic bottles market in India is estimated to grow steadily, owing to the continually increasing consumption and industrial applications of plastic-made bottles. According to the India Brand Equity Foundation (IBEF), the market demand for plastic bottles continues to expand in the country, with plastic export of USD 7.045 billion during the period of April 2019 - January 2020. Plastic projects are anticipated to increase across several products and sectors, including beverage, food and water, pharmaceutical, household sectors.
- Japan has one of the fastest-growing pharmaceutical businesses after the United States and is continuously concentrating on steady innovation and patented drugs. The Government of Japan is also contributing to this growth through deregulations for international companies to invest, thereby driving the country's pharmaceutical market.
- According to CPhI, Japan's pharmaceutical market will resume growing significantly in 2019, connected to a range of factors, such as an anticipated 10% increase in solid dose formulations from 4.7% in 2018 and constant growth for generics across all drug classes. Recognizing these needs, local pharma companies will experience an increase in demand for plastic bottles, thus stressing the growth of the market.

TOP FACTORS IMPACTING THE WORLD CAPS AND CLOSURES MARKET FOR FOOD AND BEVERAGES

Growth in demand from packaging industry

Increase in demand for packaging industry is one of the major factors that drive the caps and closure in food and beverage market. As the main motive of packaging industry is to preserve food and beverages flavor, texture, test, and extend shelf-life of it. Caps and closures help in the process to extend shelf-life of products and provide barrier to dirt, moisture, and oxygen. In addition, the trend of moving from unpacked goods to packed goods in the developing countries such as India and China is on an increase.

Manufacturing Eco-friendly caps and closures with the use of natural ingredients and recycling process

Heavy promotion of Go-green projects and eco-friendly concepts by government of all countries provide ample of opportunity to the caps and closure market. Environment is getting affected due to the usage of plastics and other chemicals in the process of manufacturing caps and closures. Further, the requirement of eco-friendly caps and closures, which use more recycled and natural ingredients, such as wood and paper board are expected to increase. Moreover, by using eco-friendly material such as paper board, wood, bamboo, PCR (Post Consumer Resin), PIR (Post Industrial Resin), and PLA (polymerized Lactic Acid) among the rest, the wastage can be reduced, which will increase the market of caps and closures globally.

Unstable price of raw material

Instability in the cost of raw materials is the major restraint factor that limits the growth of the caps and closures market. Volatile cost of raw material such as terephthalate, polypropylene (PP), polycarbonate, aluminum, and steel among others in caps and closure manufacturing affect the growth of the market. As the demand of caps and closures is on a rise, the cost of raw materials also increases, which affects the profit and cost of manufacturing caps and closures. As a result, the adoption rates of these raw materials slow down the different applications.

Top Winning Strategies

Acquisition and global expansion strategy largely drives the market. Agreement and product launch are other prominent strategies adopted by key players to remain competitive in the market. Almost 27% of the top strategies consisted of acquisition and global expansion among the key players in the caps and closures market. Agreement, product launch, and joint venture accounted for 23%, 18%, and 5%, respectively among the key strategies.

MARKET DYNAMICS

The demand of plastic caps and closures is currently exhibiting strong growth. Plastic caps and closures offer significant advantages over caps and closures made up of other materials such as metal, rubber, etc. Plastic is more economical, versatile, durable, light and resistant to corrosion. Moreover, driven by its lighter weight, it results into a lower transportation cost. PET, PP, HDPE, LDPE, etc. are some of the primary raw materials used in making plastics caps and closures.

Beverages currently represent the biggest end use sector for plastic caps and closures. We expect the global beverages market to grow at a CAGR of 3% over the next five years creating a positive impact on the demand of caps and closures. The popularity of plastic in beverage caps and closures has been increasing driven by its cost-effectiveness, durability, customizability and chemical stability. Apart

from alcoholic and non-alcoholic beverages, the demand of plastic caps and closures is also increasing in numerous other end use industries such as chemicals, food, pharmaceuticals, cosmetics, etc. Looking forward, IMARC Group expects the global plastic caps and closure market to exhibit moderate growth during the next five years.

The growing trend of e-commerce shopping is also influencing the use of plastic caps and closures. Plastic caps and closures are widely used in toiletries for producing the hair preparations products, face creams, lotions and perfumes due to rising emphasis on health and hygiene.

However, consumer health concerns and government taxes on the use of plastic caps and closures are hindering the market growth.

SEGMENT ANALYSIS

Global plastic caps and closures market is segmented based on the material type as High-Density Polyethylene (HDPE), Low-Density Polyethylene (LDPE), Polypropylene (PP), Polyethylene Terephthalate (PE), and Others. Polypropylene accounts for the significant market share due to the high usage of polypropylene plastic caps and closures in the food & drink industry and pharmaceutical industry due to its stability when exposed to high temperatures and low moisture vapor transmission. Polypropylene closures with foamed polyethylene liners have excellent sealing characteristics and offer good chemical resistance including acids, alcohols, alkalis, aqueous products, cosmetics, household oils and solvents.

High-Density Polyethylene (HDPE) segment is one of the fastest-growing segments due to rising awareness regarding the environmental hazards associated with disposed plastics and recyclability. It is used for producing caps and closures for carbonated soft drinks, juices, teas and bottled water owing to its durability and strength properties.

The market is also fragmented based on the product type as screw caps, dispensing caps, liquid carton closures, plastic aerosol sprays, plastic lotion pumps, and others. Screw caps segment dominates the market due to the high demand for screw caps because of its characteristics such as lightweight, cost-effective, and user-friendly. It is also used as an alternative to cork for sealing wine bottles.

Further, the market is also classified on the basis of food & beverages, pharmaceuticals, cosmetics & toiletries, and others. Food and beverage industry dominate the market as it is one of the fastest-growing industry with rising needs and changing habits. Consumers prefer the packed goods instead of unpacked goods especially in developing countries such as India and China. Expansion of the beverage industry and the increasing demand for online food delivery shall have a positive impact on the market. Hence, the food and beverage segment is expected to maintain its dominance over the forecasted period.

The pharmaceutical segment shall have a positive market share as plastic caps and closures have become an essential part of the final packaging of pharmaceutical products. There is an increase in the demand for plastic caps and closures due to the high usage of pre-fillable syringes, vials, and parenteral containers.

GEOGRAPHICAL PRESENTATION

By region, the global plastic caps and closures market is segmented into North America, South America, Europe, Asia-Pacific, Middle-East and Africa. Among all of the regions, North America dominated the global plastic caps and closures market due to the rising growth in the food and beverage industry. As per the Committee for Economic Development, the food and beverage industry is meeting the continuous needs of 320 million American consumers, as well as many consumers overseas. The food and beverage industry alone generates USD 164 billion in value-added and accounts for 15.3 cents out of every consumer food dollar. Hectic lifestyles have led to a shift from the trend of cooking to the trend of snacking, ready to eat food, and processed foods. Consumers are buying the packed processed and ready to eat foods. This has resulted in increasing the demand for plastic caps and closures for packing and storing those foods. Different kinds of airtight plastic closures are used for storing the food in bottles. Metal caps or closures are also used for the storage of grains in a glass container.

European countries are also witnessing the high usage of plastic caps and closures in product packaging to enhancing the aesthetics and functionality of the products. Plastic caps and closures are widely used in alcoholic and non-alcoholic beverages. Europe is the largest exporter of food and drink products in the world. According to *Food Drink Europe*, the food and drink industry has a turnover of Euros 1.1 trillion and Euros 230 billion in value-added in Europe. The majority of the companies are using injection-molded HDPE closures for packaging pharmaceutical products. There is a shift from two-piece closures to one-piece closures due to their less weight, large seal angle and require less torque.

Growing urbanization, rising per capita income, booming food & beverages and growing purchasing power are fueling the market growth in the Asia Pacific region including China, and India.

COMPETITIVE ANALYSIS

The global plastic caps and closures are witnessing the high competition with the presence of several local and international players. Amcor Limited, Silgan Holdings Inc., Comar LLC, AptarGroup, Alcoa

Corporation, Phoenix Closures, Inc., and Guala Closures Group are the leading market players with the prominent market size.

Companies are using different strategies such as portfolio expansion, product diversification, and new product launch to increase their market penetration. Different processes such as injection molding, compression molding and others are used for the production of plastic caps and closures.

The companies are entering into the collaborations, mergers, strategic partnerships and acquisitions to increase the demand for plastic caps and closures and their expansion across the globe. For instance, in January 2020, Silgan Holdings Inc. had acquired Albea's dispensing business for USD 900 million. It would enable Silgan to enhance the scope of our leading closures franchise by introducing the new products and capabilities in the highly engineered dispensing category. In August 2019, AptarGroup, Inc. had entered into an exclusive partnership with Nippon Closures Co., Ltd. (NCC) to cross-license technology for tethered beverage closures. This is the first cross-license, registered intellectual property exchange between NCC and Aptar. It would allow Aptar to grow the portfolio of dispensing closures that are more convenient for consumers and more sustainable for the environment.

The companies are also investing to increase its production capabilities around the globe. For instance, in January 2020, Berry Global Group Inc. had raised the investment of USD 20 million to add capacity for breathable films. The company would add capacity at plants in Augusta, Ky., Nashville, Tenn., McAlester, Okla., and Washington, Ga.

INDIAN PLASTIC BOTTLES MARKET

INDIAN INDUSTRY OVERVIEW

In India PET has become the primary preference in the packaging sector owing to the rigidity it offers, its eco-friendly attribute and recyclable nature. The demand for PET in the packaging of food and beverages witnessed a steep inclination after the sudden outbreak of Coronavirus in the final quarter of FY 20. This astonishing increase in demand is a ripple effect of the increasing awareness of hygiene, prompting an enhanced procurement of disposable and packaged items to reduce the chances of infection by any means. Moreover, the increasing preference for PET bottles over aluminum and glass packaging, in rapidly expanding Indian pharmaceutical sector owing to its quality standard and safety is anticipated to further propel the demand for PET in the forecast period. As the healthcare and pharmaceutical sectors are likely to witness a robust expansion due to increasing requirement for equipment and medications after the Pandemic, the need for PET bottles for medical packaging is perceived to witness an incredible surge in the coming years.

Polyethylene Terephthalate is being manufactured in India on massive capacity by Reliance Industries followed by three other companies. Hence, majority of the PET demand in India is satisfied by domestic production but cheap imports from other countries have certainly caused abrupt material injury to the Indian production in the last few years. However, the immense production capacity of PET in the country is also sufficient to cater to the export requirements from countries like Algeria, Bangladesh, Egypt, etc. Sudden spike in demand for PET from food and beverages and healthcare industries has made the manufacturers to operate over 60 per cent efficiency in order to profoundly fulfill the domestic as well as international demand.

As PET is manufactured by utilizing Mono Ethylene Glycol (MEG) and Purified Terephthalic Acid (PTA), the production and availability of these feed stocks in the domestic market considerably affects the production of PET. PET can also be segmented based on its type as CSD (Carbonated Soft Drinks), Water Packaging, Food Packaging, Non-Food Packaging, Sheer & RPER. The consumption of PET in the domestic market varies with regions too. In India, PET is majorly consumed in North and West region due to the presence of large number of end-user industries and a vast distribution channel.

India constitutes abundant production of PET by four leading manufacturers. Hence, domestic demand for PET is largely fulfilled by domestic production. In addition, India also actively participates in catering to the demand from other countries. Major companies operating in India PET Market include Reliance Industries Limited, Dhunseri Petrochem & Tea Limited, JBF Industries Limited, Indorama Ventures Public Company Limited, Toray Industries, Jiangsu Sanfangxiang Group, Eastman Chemical Company, Nan Ya Plastic Corporation, SABIC, BASF SE, Far Eastern New Century Corporation etc.

Slowdown in its automotive sector, which is one of the major end-user industries of PET resin negatively, affected the demand for the product in the first half of the financial year. This slowdown was further exacerbated by the Coronavirus outbreak compelling the government to impose a nationwide lockdown in order to contain the spread of the virus. The lockdown imposed in the final quarter of FY 20 led to a halt in production in various industries such as automotive and electronics, thereby bringing down the prices of PET at a considerable rate. Owing to the unfavorable circumstances throughout the year, prices of PET witnessed a downfall of over 10 per cent in FY 20.

OUTLOOK FOR PET BOTTLES

PET Packaging Association for Clean Environment (PACE) and National Chemical Laboratory (NCL), Pune has conducted a research study to understand the scenario of PET bottle consumption in India.

Almost 900 K tonnes of PET material was used in India in 2016 and it is established that almost 65 per cent to 70 per cent of the post-consumer PET bottles are being recycled in 45 organised recycling facilities.

PET bottles are being used for packaging of products like cough syrup, antacid, multi vitamin, food supplements. The PET material is free of Bisphenol-A, endocrine disruptive chemicals and is permitted by Indian Drugs & Cosmetic Act, Indian Pharmacopoeia and BIS. It is estimated that around 80 K tonnes of PET material is being used for pharma which is around nine per cent of the total material used. Many of the PET bottles use amber colour to improve the UV resistance of the bottle. It is estimated that 60 per cent of these bottles are recovered and used for making black fibre. It is further concluded from the study that PET bottles used in pharma take around 18 months from the time filled with products to reach recycling stream.

There are various ways in which recycling of PET bottles impacts society. First and the most obvious ways is the reduction of the total solid waste that ends up in landfills, thus creating enormous strain on the overall ecosystem. Without recycling of PET bottles, much of this would either end up in landfills or used for generating energy by incineration etc. But the conversion of PET bottles into marketable items puts them back in consumption cycle again.

Pet Bottles in the Pharma Sector

It is estimated that 80,000- 85,000 tonnes of PET were used by the pharma sector. The market has been growing at 8-10 per cent YTY basis. It is expected that it will continue to grow at the same rate for next three to five years.

PET bottle manufacturers have been adding capacity as per the requirement of the industry. These bottles conform to various BIS standards and manufactured and packed in class 10,000 environment to ensure the quality of packaging.

Various sizes of PET bottles which are used in pharma sector are mentioned below:

Sl. No.	Capacity (OFC) ML	Weight GMS
1.	30	8-10
2.	60	10-12
3.	120	12-14
4.	250	23-25

PET bottles preferred against glass bottles

PET is hygienic, strong and resistant to attack by micro-organisms, does not react with foods or beverages and will not biologically degrade. Its safety for food and beverage use is recognized by health authorities around the world. But unlike glass, PET is extremely lightweight, simple to transport and won't break, which is why it's preferred for packaging many foods and beverages. Also, glass bottles if not manufactured properly have the tendency to delaminate in the content if kept for long time. PET bottles do not exhibit any such tendency. It is possible to transport 30,000 of 100ML PET bottles in a truck against only 18,000 bottles of glass. This reduces the transport cost and environmental impact. Plastic and glass are both recyclable, but since glass can only be recycled and turned into more glass, it limits its options. On the other hand, since plastic does not lose its integrity, it can be recycled into a number of products from carpet filling to plastic lumber and so on.

PET bottles are more environment friendly in comparison to glass. Consumers are increasingly interested in authentic, 'real food' offerings and transparent PET supports this trend.

PET is a remarkably energy-efficient packaging material, with an environmental impact that compares very favorably to glass, aluminum and other container materials. Although PET's feed stocks are derived from crude oil and natural gas, approximately 40 % of that energy is trapped within the PET polymer for recapture and reuse every time PET is recycled. PET allows more products to be delivered with less packaging, less weight and less fuel for transport. These factors help explain why life cycle studies of PET have consistently shown it to be a highly sustainable material with a positive environmental profile.

The outlook for PET bottles is bright in line with growth of the products approved and accepted for using such packaging. The cough syrup, suspensions, antacids, multivitamins are estimated to grow at 10-12 per cent on YTY basis. This means that 10,000-12,000 tonnes per year will need to be processed into bottles to meet the packaging demand of the pharma sector.

RECYCLING TRENDS: INDIA AND ABROAD

Despite being in existence for over six to seven decades and with such an extensive use; many are not aware of the fact that PET bottles can be 100% recycled and are being widely recycled into a wide array of products.

The recycling rates of PET bottles vary across the world. Countries like Japan and Germany are far ahead having achieved a very high rate of recycling PET products compared to the rest of the world. PET recycling is not uniformly high, even if one considers only the developed countries. For example, in the US, only a little over 30% of the PET bottles in circulation is collected for recycling, and more so, a quarter of that gets exported to other countries like China to get recycled. The situation is roughly same in Europe as well. Even though Europe has a higher collection rate of 59%, a very large portion of it is once again exported to China, Hong Kong and other countries.

PACKAGING INDUSTRY - INDIAN MARKET OVERVIEW

MARKET OVERVIEW

Growing at 18 per cent per annum, country's plastic packaging industry is expected to reach USD 73 billion in the next four years. The size of the industry in India is about USD 32 billion, which constitutes only 4 per cent of the global packaging industry. The per capita packaging consumption in India is quite low at 4.3 kg, compared to countries like Germany and Taiwan where it is 42 kg and 19 kg, respectively. In the coming years it is expected to grow at 18 per cent per annum. The overall packaging industry in India has a huge growth potential and is expected to reach USD 73 billion in the year 2020.

The industry is driven by key factors like rising population, increase in income levels and changing lifestyles. Demand from rural sector for packaged products is being fuelled by increasing media penetration through the means of internet and television. Organized retail and boom in e-commerce will fuel growth of plastic packaging and per capita consumption to be doubled in five years

India is a growing market for plastics and consumes about 12.8 million tonnes of plastics annually against the global consumption of 285 million tonnes per year. The plastics and polymer consumption is growing at an average rate of 10 per cent. About 30,000 processing units with 1,13,000 processing machines have created manufacturing capacity of 30 million tonnes per annum in India.

Over the past couple of years, our company has outgrown itself into a distinguished large-scale organization specializing in pet bottle caps of various shapes, sizes and colours along with cap handles having plentiful applications.

Our Company manufactures caps and closures in Continuous Compression Molding Machine imported from Sacmi Inc, Italy with Cool + Technology using 100% virgin food grade quality material. Production takes place in an enclosed dust proof environment with quality testing at regular intervals. The products are packed in corrugated boxes with proper bursting strength inside plastic liners. Overall color migration test, heavy metal testing and analysis is done to ensure quality product.

In addition to the supply of pet bottle caps, our Company also trades in Shrink film as an additional service to its existing customers. This product has a demand within our existing customer base and therefore, to provide one-stop solution to their needs, we had started selling this product. Shrink films are manufactured by our associate concern, M/s Airborne Technologies Private Limited. Shrink film is a shrink wrap made of LDPE (Low Density Polyethylene) material used for secondary and tertiary packaging due to its advantages and specific properties. Potential applications for collation shrink film mainly include bundle-packaging of beverages such as water, soft drinks, energy drinks, etc. and is a cost-effective substitute of formerly used corrugated boxes. The market for shrink film demand is growing and a lot of bottling / beverages companies are shifting from corrugated boxes on account of its own benefits.

Furthermore, our company is also involved in trading of plastic granules besides using it as a raw material for its own consumption. Plastic granules are made up of particles that are formed as a result of the progressive enlargement of primary particles that change their original identity. These granules can be utilized in the production of a vast range of plastic products, such as chairs, mugs, bottles, tanks, to name a few and are known for their fine finishing and easy malleability. The company provides a wide range of granules such as Polypropylene Granule, High Density Polyethylene (HDPE) Granules, Low Density Polyethylene (LDPE), Linear Low-Density Polyethylene (LLDPE) Granules and many more. The plastic granules are procured domestically and also imported from foreign countries.

Our company adheres to some of industry's best quality product accreditations. Our Company has obtained registration of 27mm Alaska Cap (Bisleri Green sample) from Vimta Labs, complying to the requirements of IS:15410-2003 based on the audit conducted by Bisleri on regular intervals (**Certificate No. VLL/VLS/19/06905/001 issued on October 7th 2019**). Our Company has also undergone audit of FSSC 22000, Version 5.1 which was completed on August 31, 2021 and has been recommended for certification. The scope of the certification audit was Manufacturing (moulding, embossing / printing) of Plastic Caps and Closures in contact with Packaged Drinking Water, Carbonated water and Non-Alcoholic Beverages (Carbonated/Non-Carbonated) and packing in LDPE Liner.

MANUFACTURING PROCESS - PET BOTTLE CAPS

Machine Flow Chart of Compression Moulding

Our company produces pet bottle caps and closures which involves a series of activities which constitutes the entire manufacturing process. The detailed machine flow chart is as under:

Raw Material - Raw material i.e., HDPE/PP is used as per the requirement of product. It is poured in a drum / bucket. The automatic extruder extrudes the raw material as per hopper requirement and thereafter conveys the material to the extruder of Continuous Compression Molding Machine.

Heating – After the material is conveyed, the melting zone / extruder provides heat to the raw material sufficient enough to melt it into liquid form. Thereafter, the extruder conveys it to the core and cavity.

Core / cavity - Liquid plastic is dropped in the lower cavity. It is then compressed by the upper punch / core to give it the desired shape and size.

Cooling – After the desired shape is given, cooling section provides cooling to the product with chilled water and coolant which helps it to stay in the shape and conveys it to another cooling section called “TARA”.

Cap Vision System (Camera) - CVS is installed just before “TARA” to perform visual checking of the product.

Cooling - This helps in proper cooling of the product so that the product does not deform during subsequent processes. After cooling, the products are conveyed to the “Cap Orientor” by a bucket elevator.

Cap Orientation - It process includes orientation of all the caps in a single row to facilitate slitting of caps.

Slitting - Caps are slitted with the help of a bridge between cap’s sealing part and upper part.

Folding - After slitting, folding of caps is performed and conveyed to the counting section.

Counting - Counting of caps is performed using counting sensor.

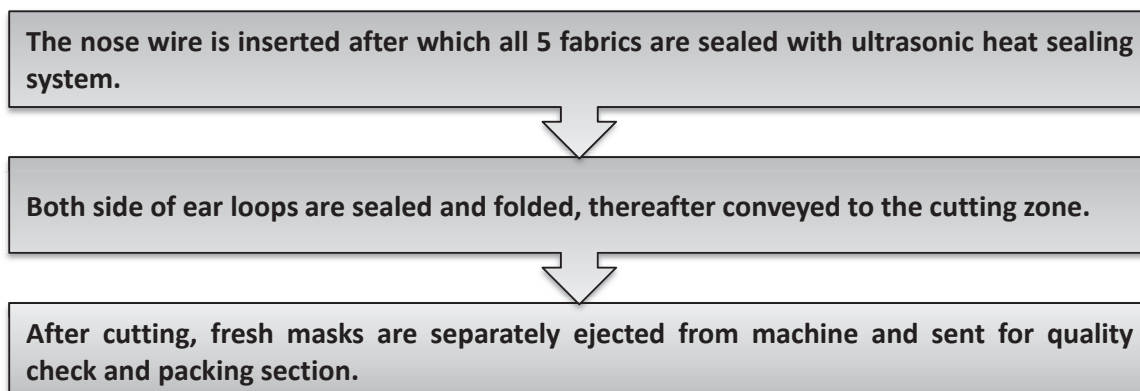

Finished Product - After counting, finished products are conveyed to the packing boxes for final packing.

MANUFACTURING PROCESS – FACE MASKS

Manufacturing of 5 layers N95 FFP2 face masks is performed with fully automatic machines. All the fabrics are used in a single line and part of a continuous process. 5 Layers of fabric are as follows:

- Top Layer: PP Non-woven spun bound Hydrophobic
- 2nd Layer: Melt Blown Fabric
- 3rd Layer: Hot Air Cotton
- 4th Layer: Melt Blown Fabric
- 5th Layer: PP Non-woven spun bound Hydrophilic

The process is as below:

RAW MATERIALS

A. Pet Bottle Caps

The raw material used in manufacturing of PET Bottles Caps and Closures is **HDPE (High Density Polyethylene)** Granules and Master Batch. Raw materials are available in local market.

The main input i.e., Food Grade Polymers, Plastic Granules, Food Grade Granules and Additives are available in plenty from Haldia Petrochemicals Ltd., Reliance, Indian Oil Corporation Limited and local suppliers. The manufacturers have their own distribution channels. Nearness of the input sources is likely to save the freight charges and make the unit more competitive. It will also make significant saving in inventory carrying cost since easy access of input materials would result in reduction in inventory carrying cost.

Granules are available in the open market either directly from the manufacturers or these are imported, if required. Therefore, there is no shortage of raw materials in the market. Polymers are available from the following manufacturers:

- Haldia Petrochemicals Ltd
- Indian Oil Corporation Limited
- Reliance Industries Limited
- Borouge PTE Ltd.
- ACTEGA DS, Germany

Other raw materials like additives, tools & dies, pigments, colorants, lubricants, oil etc. are locally available in plenty. Other batch chemicals including additives and colour required in the process are available from nearby market.

SALES AND MARKETING SETUP

Marketing is an important function of any organization and our company is no exception to it. We have deployed a team of efficient marketing professionals for the marketing and promotion of our products. Our success lies in the strength of our relationship with our clients who have been associated with our company since a long period of time. Our promoter Mr. Rajeev Goenka through his vast experience and good connections with the clients and owing to timely delivery of quality and safe products plays an instrumental role in creating and expanding the work platform for our company.

Regular interaction is ensured not only to maintain the client base but also to gain insight into the design and specification needs of our diverse clientele. Currently we are supplying our product to north, east and north-east India and we look forward to expand further.

Looking into this aspect, our marketing strategy is framed in the following way:

- We sourced new customers by accessing the list of bottlers from the website of BIS and contacted them directly through call or visiting their plant.
- We obtained the technical approval from Bisleri International Private Limited (BIPL) – BIPL provided their list of own units, Co-Packers & Franchisees to approach them directly and send samples – in that line approached the BIPL approved water packaging units and started doing business with them.
- We printed the contact details on the packing boxes so that other customers can contact us directly to procure materials.
- We started web-based marketing of our product at Indiamart, Exporters India, and other related portals to reach out to the possible customers for selling products.

We also have an effective feedback procedure in place for our clients regarding our products which help us in improving and maintaining the efficiency of our products and achieving desired level of customer satisfaction.

COMPETITION

“Plastic made Products” is a global industry and consequently we face intense competition from various domestic and international manufacturers and traders. Being a fragmented industry, the competition emerges from various small and big players in the industry. Even in the city in which we are operating in Howrah, Kolkata districts there are traders and manufacturers of pet bottle caps and closures but none of our competitors have resources greater than available with us.

We believe the principal elements of competition in our industry are quality, technical ability, performance record, sustainable relationship with existing clients and vendors, use of technically upgraded plant and machinery, timely delivery and reliability. We compete against our competitors by establishing ourselves as knowledge-based production unit with industry expertise in the segment which enables us to provide our clients with quality products. However, price is the deciding factor in

most cases. The industry in which the company operates is unorganized and fragmented with certain small and medium – sized companies and entities.

However, in the case of imports and inter- state supplies, an Integrated Goods and Service Tax (“**IGST**”) shall be levied by the central government, proceeds of which will be shared by the central and the recipient state government. IGST is an Indian innovation which would help tax move along with goods/services, across states and therefore reduce refund situations at state borders. GST is expected to bring a significant shift from origin-based taxation to a destination-based tax structure. This is likely to impact not only the operating business models but also the revenues of the centre/states. It has the potential to impact cash flow, pricing, working capital, supply chain and IT systems and hence provides an opportunity to transform your business. GST allow equal opportunity to the centre and the state to tax all supplies of goods and services. The single GST replaced several former taxes and levies which includes central excise duty, services tax, additional customs duty, surcharges, state-level value added tax and octroi.

Copyright registration may expedite infringement proceedings and reduce delay caused due to evidentiary considerations. Once registered, the copyright protection of a work lasts for sixty (60) years. h) DEPRECIATION AND AMORTIZATION:

i. Depreciation of Tangible Assets:

Depreciation on tangible property, plant & equipment is charged on straight line method over the useful life/remaining useful life of the asset as per the Companies Act, 2013. Depreciation on assets purchased/acquired during the year is charged from the date of purchase/acquisition of the asset or from the day the asset is ready for its intended use. Similarly, depreciation on assets sold/discarded during the year is charged up to the date when the asset is sold/discarded.

Depreciation is calculated using the Straight line method over their estimated useful lives. The estimates of useful lives of tangible assets are as follows:

Class of Asset	Useful life as per Schedule II	Useful life as per Group
Computer	3 years	3 Years
Furniture & Fixtures	10 Years	10 Years
Office Equipment	5 Years	5 Years
Plant and Machinery	15 Years	15 Years
Factory Shed/Building	3 Years	3 Years
Electrical Installation	10 Years	10 Years
Vehicles	8 Years	8 Years

Leasehold improvements are amortised over the period of the lease or life of the asset whichever is less.

i) **INVENTORIES:**

Inventories of traded goods are valued at lower of cost and net realizable value. Cost comprises of all costs of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost formula used is FIFO.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated cost necessary to make the sale.

j) **IMPAIRMENT OF ASSETS:**

Assessment is done at each Balance Sheet date as to whether there is any indication that a tangible asset might be impaired. For the purpose of assessing impairment, the smallest identifiable group of assets that generates cash inflows from continuing use that are largely independent of the cash flows from other assets or other group of assets, is considered as a cash generating unit. If any such indication exists, an estimate of the recoverable amount of asset/ cash generating unit is made.

Assets whose carrying value exceeds their recoverable amount are written down to recoverable amount. Recoverable amount is higher of an asset's or cash generating unit's net selling price and its value in use. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life. Assessment is also done at each Balance Sheet date as to whether there is any indication that an impairment loss recognized for an asset in prior accounting period may no longer exist or may have decreased.

k) **EMPLOYEE BENEFITS:**

(i) **Short-term employee benefits**

Short term employee benefits are recognized as an expense at the undiscounted amount in the statement of Profit and loss for the year which includes benefits like salary, wages, bonus and are recognized as expenses in the period in which the employee renders the related service.

Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. Depreciation is calculated using the Straight Line method over their estimated useful life. The estimates of useful lives of tangible assets are as follows:

If any such indication exists, an estimate of the recoverable amount of asset/cash generating unit is made.

Assets whose carrying value exceeds their recoverable amount are written down to recoverable amount. Recoverable amount is higher of an asset's or cash generating unit's net selling price and its value in use. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life. KEY FACTORS THAT MAY AFFECT OUR RESULTS OF OPERATION

Our results of operations have been, and will be, affected by many factors, some of which are beyond our control. Our results of operations and financial conditions are affected by numerous factors including the following:

A. Expansion of customer base and new sales to existing customers

Customer relationships are the core of our business. Our ability to grow our customer base and drive market adoption of our products is affected by the pace at which the plastic industry grows. We expect that our revenue growth will be primarily driven by the pace of adoption of our offerings. This will drive our ability to acquire new customers and increase sales to existing customers, which in turn, will affect our future financial performance.

We believe we have a substantial opportunity to grow our customer base. We have invested, and intend to continue to invest, in order to drive sales to new customers. We have deployed a team of efficient marketing professionals for the marketing and promotion of our products. Our success lies in the strength of our relationship with our clients who have been associated with our company since a long period of time. Our business from existing customers has steadily grown and contributed a significant portion of our revenue. We believe that our ability to establish and strengthen customer relationships and expand the scope of our products and services will be an important factor in our future growth and our ability to continue increasing our profitability.

B. Product development capabilities to meet evolving preferences in the Indian plastic industry

We have grown our operations by introducing quality products to meet potential requirements of our customers and create market for our products. To service and grow our relationships with

our existing customers and to win new customers, we must be able to provide them with products that address their requirements, to anticipate and understand trends in their relevant markets and to continually address their requirements as those requirements change and evolve. In this regard, we believe that our strong culture of innovation, our workforce and our research and testing facilities have enabled us to expand the range of our offerings to customers and improve the delivery of our products. We intend to continue to grow our portfolio of various sized products going forward as these products have increasingly represented our revenue from operations, widened the end-customer base that we cater to, and typically have a higher margin profile. For further information, see “*Our Business – Our Business Strategies*” on page 154 of this Draft Red Herring Prospectus.

Our success is dependent on our ability to identify and respond to the economic, social, and other trends that affect demographic and end-customer preferences in a variety of our product categories. We commit time, funds and other resources to identify product opportunities and develop differently sized products to meet these requirements. Industry trends change from time to time and may affect the demand for a particular type of product. Our ability to consistently gain market share therefore depends on our ability to develop differently sized products and the acceptance and demand for these products by end-customers and dealers. If we are able to anticipate and respond to our customers’ requirements on a timely and cost-efficient basis, we would expect to receive repeat business from existing customers. Further, leveraging on our present portfolio of customers and expertise in the verticals of our existing customers we aim to develop new customer relationships by identifying potential customers that operate within the same verticals as our existing customers. In addition, if we are able to generate healthy demand for our products, we may be able to increase our price, which would consequently lead to an increase in our revenues and profit margins. Conversely, if we are unable to provide innovative services to our customers, either at all or at an acceptable price, or if our customers are dissatisfied with our work for any other reason, it would have an adverse effect on our revenues and our profits.

C. Cost of raw materials consumed and Gross Margin

We significantly depend on our main raw materials inputs i.e., Food Grade Polymers, Plastic Granules, Food Grade Granules and Additives are available in plenty from Haldia Petrochemicals Ltd., Reliance Industries Ltd., Indian Oil Corporation Limited and local suppliers. The manufacturers have their own distribution channels. Nearness of the input sources is likely to save the freight charges and make the unit more competitive. It will also make significant saving in inventory carrying cost since easy access of input materials would result in reduction in inventory carrying cost, thereby increasing gross margin. Raw materials are generally available in local market. Granules are available in the open market either directly from the manufacturers or these are imported, if required. Therefore, there is no shortage of raw materials in the market. Other raw materials like additives, tools & dies, pigments, colorants, lubricants, oil etc. are locally available in plenty. Other batch chemicals including additives and colours required in the process are available from nearby market. For further information on procurement of our raw materials, see “*Our Business – Raw Materials*” on page 149 of this Draft Red Herring Prospectus.

D. Sales and Marketing

We have deployed a team of efficient marketing professionals for the marketing and promotion of our products. Regular interaction is ensured not only to maintain the client base but also to gain insight into the design and specification needs of our diverse clientele. With large sales potential, year-round production, high demand of our products, streamlined manufacturing process, raw material proximity, some extent of backward integration and availability of professional & technical expertise of our promoters, we plan to grow geographically in the

foreseeable period of time. Currently we are supplying our product to north, east and north-east India and we look forward to expand further. For further information on our brand building initiatives, see **“Our Business – Sales and Marketing Setup”** on page 156 of this Draft Red Herring Prospectus.

In the event other competitors elect to significantly increase their media spends in the future, we may be compelled to do so to remain competitive, which may prevent us from realizing our expected profitability levels.

E. Capacity utilization and capacity expansion

Capacity utilization is affected by our product mix and the demand and supply balance, which in turn affects our gross profit margin. Our ability to maintain our profitability depends on our ability to optimize the product mix to support high-margin with consistent long-term demand; and the demand and supply balance of our products in the principal and target markets. Efficient capacity utilization allows us to spread our fixed costs, resulting in a higher profit margin. Manufacturing levels are affected by the number of lost days due to scheduled and unscheduled plant shutdowns. Our actual production levels and utilization rates may differ from the estimated manufacturing capacities of our facilities. Our capacity utilization for Howrah, West Bengal manufacturing facility of PET bottle cap was 81.47%, 68.77% and 47.55% in Fiscal 2019, 2020 and 2021, respectively and of Face Masks was 5.48% in Fiscal 2021 and capacity utilization for Kotdwar, Uttarakhand manufacturing facility of PET bottle cap Unit was 72.27% in Fiscal 2021. For further information, see **“Our Business – Capacity Utilization”** on pages 150 of this Draft Red Herring Prospectus.

Our ability to profitably expand our capacities is dependent on our ability to efficiently manage our corresponding increase in expenditure and achieve timely completion and commissioning of the installed capacity in Howrah and Uttarakhand. With our installed capacity and greater utilization of the resources translate into commercial production in line with increased demand for our products, it will result in an increase in our production volumes.

F. Changes in laws and regulations relating to the industry in which we operate

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals.

G. Increasing competition in the industry;

The market for plastic PET bottle cap is highly competitive, and we expect competition to persist and intensify. We compete with companies that have established their presence in specific regions as part of their strategy. These competitors may limit our opportunity to increase our market share as a result of a stronger dealer network in such regions, and may also compete with us on pricing of products. Competition from existing and new companies could make attaining market share growth more difficult. Our market position will also depend on effective marketing initiatives and our ability to anticipate and respond to various competitive factors affecting the industry, including new products, pricing strategy of competitors, changes in consumer preferences and general economic, political and social conditions in the markets in which we do business. If our competitors develop and implement methodologies that yield greater efficiency

and productivity, they may be able to offer similar services at lower prices than we do without adversely affecting our profit margins.

H. Seasonality

The PET bottle cap business is sensitive to seasonality, with revenues recorded during the winter season being relatively lower compared to other periods especially summer season. During the winter season, due to low usage of bottles, purchase of caps and closures is curtailed and while we may continue to incur operating expenses, our revenue from the sale of our products may be delayed or reduced. As a result of such fluctuations, our sales and results of operations may vary by fiscal quarter, and the sales and results of operations of any given fiscal quarter may not be relied upon as indicators of the sales or results of operations of other fiscal quarters or of our future performance. Such variations may adversely affect our manufacturing and sales volumes in a given period, and could therefore have an impact on our comparative results of operations during the relevant period.

I. Changes in fiscal, economic or political conditions in India

We are incorporated in India and we conduct our corporate affairs and our business in India. Consequently, our business operations, financial performance and the market price of our Equity Shares are affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy or certain regions in India, could adversely affect our business, results of operations and financial condition along with the price of the Equity Shares.

J. COVID-19 Pandemic

The current outbreak of COVID-19 pandemic and the preventative or protective actions that governments around the world have taken to counter the effects of the pandemic have resulted in a period of economic downturn and business disruption in India. The World Health Organization declared the outbreak of COVID-19 as a public health emergency of international concern on January 30, 2020 and a pandemic on March 11, 2020. The Government of India announced a nation-wide lockdown on March 24, 2020 and imposed several restrictions. In view of the nationwide lockdown announced by the Government of India to control the spread of COVID-19, our business operations were temporarily disrupted from March 24, 2020. Since then, we have resumed operations in a phased manner as per the Government of India and state government's directives. Our operations were affected by this pandemic revenue and profitability declined due to this in the last financial year. Further the impact of the ongoing pandemic, particularly the second wave and more communicable strain of the virus that has affected India in April, 2021, also resulted in an adverse impact on our profitability as our operating expenses, since our factories were partially operational. We also incurred and may continue to incur additional expenses in complying with evolving government regulations, including with respect to social distancing measures, food safety norms, and sanitization practices.

For more information on these and other factors / development which have or may affect us, please refer to chapters titled "**Risk Factors**", "**Our Industry**" and "**Our Business**" beginning on page 35, 116 and 138 respectively of this Draft Red Herring Prospectus.

For the purpose of assessing impairment, the smallest identifiable group of assets that generates cash inflows from continuing use that are largely independent of the cash flows from other assets or other group of assets, is considered as a cash generating unit. If any such indication exists, an estimate of the recoverable amount of asset/cash generating unit is made.

Assets whose carrying value exceeds their recoverable amount are written down to recoverable amount. Recoverable amount is higher of an asset's or cash generating unit's net selling price and its value in use. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019 (collectively the **"UPI Circular"**) in relation to streamlining the process of public issue of equity shares. Pursuant to the UPI Circular, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for Bids by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- **Phase I:** This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Bidder had the option to submit the Bid cum Application Form with any of the intermediaries and use his / her UPI ID for the purpose of blocking of funds. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.
- **Phase III:** The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing would be reduced to three Working Days.

Illustration of the Book Building and Price Discovery Process

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of Rs. 20/- to Rs. 24/- per share, Issue size of 3,000 Equity Shares and receipt of five Bid from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Applied Quantity	Bid Amount (Rs.)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The Price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., Rs. 22.00 in the above example. The Issuer in consultation with the BRLM, may finalize the Issue Price at or below such Cut-Off Price, i.e., at or below Rs. 22.00.
